

## Created your own design.

### Four simple steps for supplying your own artwork.

1. Files should be exported/presented in **PDF** format. (Adobe Acrobat)
2. All graphics/images should be converted to **CMYK** colour space. As well as **300 dpi** minimum in resolution.  
*(Normally photos are saved in cameras as RGB colour space for screen display)*
3. Finished art work must have a **5mm bleed** over page size with **crop marks**.
4. If possible to retain your exact design, **convert fonts to outline** before exporting to PDF.

*All graphics/images should be converted to CMYK colour space. As well as 300 dpi minimum in resolution.*

*Crop Marks - On corner of Trimmed artwork*

*5mm Bleed over page size*

*If possible to retain your exact design, convert fonts to outline*
